

卷之三

## ► SANTA FE ULTRA155

## PERFORMANCE

Water Removal	165 Pints / 10.075 Gallons
Efficiency	1.3 Pint/ kWh
Energy Factor	0.4 L/kWh
Capacity	391 CFM @ 0.0" W.C.
	363 CFM @ 0.2" W.C.
	337 CFM @ 0.4" W.C.
Operating Temperature Range	49°F Min... 98°F Max.
	100°F to 140°F Opt. Ft. x 10000 Cu. Ft.

ELECTRICAL

<b>Rates</b>	100 watts at 80% and 90% load
<b>Supply Voltage</b>	115 volt - 1 phase - 60 Hz
<b>Current Draw</b>	0.5 amperes
<b>Power Cord</b>	IEC, 115 VAC, Ground
<b>Circuit Requirements</b>	15 Amp dedicated

#### **SPECIFICATIONS**

Quick Disconnection	1/2" Round Inlet, 1/2" Nipple Inlet, 1/2" Oval Outlet
Drain Connection	3/4" Threaded Female NPT
Refrigerant	R134A, 1 lb. 13 oz.
Unit Dimensions	20.75" W x 21.75" H x 43.50"
Unit Weight	160 lbs

2018

Shipping Dimensions	16" W x 28" H x 4" D
Shipping Weight	162 lbs.
Pallet Quantity	1 per pallet
UPC Number	890007000499
Shipping Options	GLI

The Ultra155 features a patented heat exchanger technology that allows the dehumidifier to remove up to 155-pints of water a day, and provide fresh air ventilation while using only an unprecedented 9 amperes (7.3 pints per kilowatt hour). Ideal for larger homes, the unit effectively and efficiently dehumidifies up to 3500-square feet.

MODEL 4031070

FEATURES

- Extremely energy efficient
  - Engineered for low temperature operation providing comfort year round
  - Use of DEH 3000IR digital control for outdoor air ventilation and humidity control
  - Suggested MERV-13 filtration to improve indoor air quality
  - During option for fresh outdoor air ventilation
  - Push button start for maintenance ventilation

**SANTA-FE™**  
THE NEW SECURITY SYSTEM

BUILT TO LAST. POWERED TO PROTECT.

## Whole House Dehumidification For Comfort, Health And Property Protection

According to experts, controlling humidity inside the home is essential for whole-home comfort, reducing health risks, and protecting the structure of the home and its contents. While the air conditioning in your home will remove moisture from the air, it only does so when it is running for a significant amount of time, and never to a set relative humidity. Newer systems offer dehumidification but in reality they are only overcooling to try to remove more moisture.

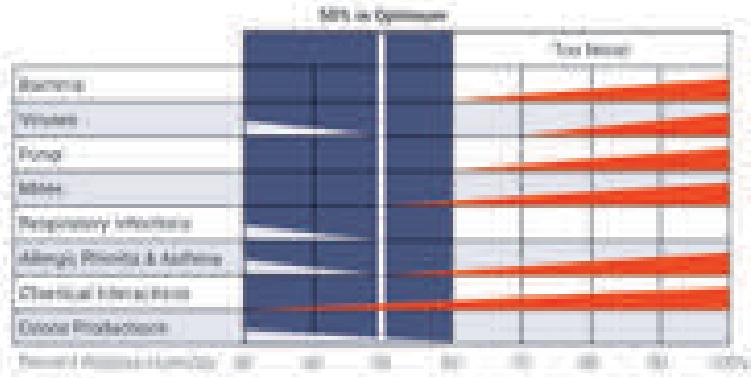

Indoor humidity levels can rise dramatically when outside temperatures are moderate, and the air conditioner is not running. The Santa Fe Ultra Series Whole House Ventilating Dehumidifiers are the solution to healthy, comfortable living.

### Comfort

Addressing comfort in the home is very important to your family's quality of life. High humidity can cause us to feel either hot and sticky or cold and clammy, while also contributing to musty odors in the home.

### Health

According to the Environmental Protection Agency, health problems associated with poor indoor air quality include eye irritation, allergies, headaches and respiratory problems such as asthma. The chart below shows that 50 percent is the optimum relative humidity level during the humid times of the year when it comes to protecting your health.

### Property Protection

Maintaining humidity levels below 60 percent is one of the most important steps in protecting a home and its contents. Excess moisture in the home can cause musty odors and be detrimental to wood floors, furniture, artwork, electronics, and even the home's overall structure.

### The Solution

The Santa Fe Ultra Series Whole House Ventilating Dehumidifiers provide dedicated dehumidification, optional mechanical outdoor air ventilation, and superior MERV 13 filtration to create an indoor environment that is healthy, comfortable, and protected. Manufactured in Madison, WI, these commercial-grade units are energy-efficient and backed by an industry-leading 6-year warranty.
