Bio Modifier w/ Hydrocide

Premium Odor Remover

Bio Modifier w/ Hydrocide

Bio-Modifier w/ Hydrocide is a ready-to-use, highly active solution with strong odor counteractants to immediately knock down and keep odors suppressed while bacterial enzymes go to work.

Bio-Modifier w/ Hydrocide contains the highest level of bacteria possible, producing multiple enzymes to digest odors at the source quickly and effectively. It will eliminate odors caused by urine, mold, mildew, organic rot, vomit, smoke, skunk, protein fire residue and more.

Bio-Modifier w/ Hydrocide changes the odor at the molecular level and works in much shorter time than typical bacteria/enzyme products. Bio-Modifier w/ Hydrocide is the ideal product to use in apartments, commercial jobs, or any situation where time may be a factor. Used with the Water Claw or Flash Spotter, Bio-Modifier w/ Hydrocide neutralizes odors deep in the carpet and pad.

- 1 - 2 deodorizing punch, odor counteractant then digestion
- Activated complex mixture of bacterial enzymes for the complete deodorization of severe urine odors
- Modifies and/or digests the molecular structure of severe odors
- The most powerful and effective odor control treatment
- Gets stronger the longer you leave it on.

Part Number: CD01GL

RTU pH - 8.0

Dilution Ratio: RTU

Contents: One U.S. Gallon (3.79 Litres)

Available in Gallons and 4 x 1 gallon cases

DIRECTIONS

Thoroughly clean all contaminated areas.

Saturate contaminated area with sufficient product to penetrate through carpet backing and pad. Use with Injectimate to help product reach sub-surface contamination. The presence of moisture allows Bio-Modifier to continue working for several days.
