

QUANTUM...

Chemical Residue Remover
Peroxide-Free
Safe & Non-Toxic
Works Fast, Saves Time

Benefect Quantum Residue Remover is a high performance bio-based & peroxide-free cleaner specifically formulated for removal of microscopic chemical residues, particularly from clandestine or illicit drug use & production (such as methamphetamine, fentanyl, heroin, oxycodone, etc.). Also effective for allergens as well as tear gas and pepper spray removal. Lab tested & field proven.

Unparalleled Cleaning Efficiency

Quantum surpasses the most stringent standards for safety & cleaning efficiency by rapidly reducing residues down to the smallest levels possible (called quantum amounts), in only 10 minutes! Current international standards for methamphetamine decontamination promote safe cleaning & removal, not neutralization, encapsulation or oxidization. Traditional oxidizers (such as hydrogen peroxide) can create unknown by-products & VOCs which can also be hazardous. Quantum uses optimized dynamic surfactants & counter ions to disperse & suspend organic chemical contaminants for simple, complete removal.

Unparalleled Safety

Quantum is also safe for skin & if inhaled & won't damage common indoor surfaces. Quantum contains only botanically-sourced or sustainable ingredients & does NOT contain any VOCs (Volatile Organic Compounds), oxidizers such as hydrogen peroxide, ammonia nor any bleach, chlorine, petrochemicals, phosphates, solvents, dyes, fragrances or other hazardous or unnecessary ingredients. No mixing required, product is ready to use.

Quantum is ideal for the cleaning & removal of contaminants & residues of organic chemicals on non-porous & semi-porous surfaces (walls, floors, etc.), as well as fixtures & contents.
