

**PROCHEM.**

## Paint, Oil and Grease Remover

Removes tough oil-based spots like tree sap, tar, blacktop track-off, dried oil-based paint, lipstick, nail polish, rubber and plastic wheel marks, plus many inks. The non-volatile dry solvent formulation means the product spotter is less hazardous than many other paint, oil and grease removers. Use on any solvent-safe surface including most synthetic and natural fibers and hard surfaces such as glass and tile. Rinses clean with a water-based detergent. Approved for sale in California.

Review these [Tech Tips](#) for expert guidance on spots and stains removal.
