

Layfield Medical Products Receives Health Canada Interim Order Authorization for Medical Grade Respirators

Health Canada Interim Order Approves Layfield Particulate Respirator MLL-1970E

FOR IMMEDIATE RELEASE

In Richmond, BC, January 28, 2021 – Layfield Medical Products does more than provide great products to our customers. At Layfield we design and deliver customized solutions to protect Our Families, Our Communities, and Our Environment; **We Protect!** As a perennial member of Canada's Best Managed Companies, our priority is to protect the health and safety of frontline workers in Canada who serve our Canadian communities.

Health Canada has now approved Layfield's Particulate respirator 1970E for use by healthcare personnel under section 5 of the Interim Order Respecting the Sale of Medical Devices for use in Relation to COVID-19; Reference Number 324962; Device ID 1028385. The 1970E-L3 Health Care + Surgical Particulate Respirator is ASTM F2100 Level 3 qualified and has a Bacterial and Particle Filtration Efficiency of greater or equal to 98% (BFE and PFE \geq 98%).

Canadian Health Care workers and other frontline staff need a steady and reliable source of personal protective equipment. We are determined that every frontline worker should go to work knowing they will have the personal protective equipment they need to do their jobs, with the peace of mind that their protective equipment meets the most rigorous of safety standards. To accomplish this, we have collaborated with Maple Leaf Laboratories, a Canadian PPE Research & Development company. We will produce over 50 million masks per year in our state-of-the-art medical manufacturing facility in British Columbia.

Combining Layfield's 40 years of manufacturing experience with the expertise of Maple Leaf Laboratories, we are set to produce the highest quality PPE on the market.

For more information, see [Layfield Medical Personal Protection Equipment](#).

About Layfield Medical Products: Layfield Medical Products delivers industry-leading medical product solutions following strict, quality-controlled manufacturing processes certified by Health Canada, ISO 9001 and IFS PACsecure. We take pride in providing personal protection equipment that meets the highest standards in North America. With a secure supply chain, we can fulfill our mission of protecting all health care workers and safety professionals from harmful exposures, making our communities safer for everyone.
